

HOW TO FIND IR PROCEDURE INFORMATION

How To

- Visit ir.svrads.com (alternate address if unreachable: ref.mcbradiology.com/IR.html).
- Click on For Providers or For Schedulers as appropriate.
- Click desired procedure.
- Click refresh button on web browser to get the most up-to-date PDF version.

FOR INPATIENT & ER PATIENT PROCEDURES

- The ordering provider is responsible for placing any desired fluid lab orders at the time the procedure is ordered. A specimen will not be sent for testing if lab orders are not present at the time the procedure is performed.
- The RAs and Technologists are no longer allowed to accept verbal procedure orders from the ordering provider or to correct erroneous orders. The provider or his/her designee must place the orders themselves.

FOR OUTPATIENT PROCEDURES

- If a procedure involves removing fluid that needs to be sent for testing, the paper/electronic order must specify what fluid orders are desired.
